German Engineering for Pure Water Solutions

# About MMB

At Morsbach Maschinen Bau GmbH (MMB), we combine the heritage of German precision with modern innovation to deliver superior pumping systems. We are not just a manufacturer; we are a partner dedicated to efficiency and durability.

**Engineering Excellence:** Rooted in our German origins, every unit is built to rigorous standards.

**Premium Material Construction:** We prioritize longevity by utilizing high-grade Stainless Steel.

**Dedicated to Purity:** Our technology is specifically designed to maintain water safety and hygiene.

# Submersible Pumps

## MMB 6S Series Submersible Pumps

The 6S Series is engineered for maximum durability and efficiency in deep well applications. Constructed entirely from high-grade stainless steel.

Parameter	Value	Unit
Flow Rate	Up to 80	m <sup>3</sup> /h
Head	Up to 400	m
Power	0.37 - 37	kW
Efficiency	Up to 84	%
Material	AISI 304 / 316	Stainless Steel

Submersible Pumps

MMB 4S Series Submersible Pumps

Compact yet powerful, the 4S Series delivers reliable performance for residential and small-scale agricultural needs.

Parameter	Value	Unit
Flow Rate	Up to 24	m³/h
Head	Up to 300	m
Power	0.37 - 7.5	kW
Diameter	4	inches
Material	AISI 304	Stainless Steel

# Multistage Pumps

## MMB MV Vertical Multistage Pumps

The MV Series represents the pinnacle of high-pressure pumping technology. Its vertical in-line design saves space while delivering exceptional pressure.

Parameter	Value	Unit
Flow Rate	Up to 120	m <sup>3</sup> /h
Head	Up to 320	m
Max Pressure	30	bar
Liquid Temp	-15 to +120	°C
Flange	DIN / ANSI	Standard

# Motors

## MMB M-Series Submersible Motors

MMB submersible motors are the heart of our pumping systems. Designed for continuous duty in submerged conditions.

Parameter	Value	Unit
Power Range	0.37 - 110	kW
Voltage	220 - 415	V
Frequency	50 / 60	Hz
Protection	IP68	Class
Insulation	Class F	Standard
